Summary

Dedicated Front End Developer with 1.8 years of hands-on experience in designing, developing, and maintaining dynamic web applications. Adept at leveraging Angular frameworks (7-16) to create seamless and responsive user interfaces. Successfully delivered a project from inception to completion, showcasing strong problem-solving skills and a keen eye for detail. Proven ability in post-launch maintenance, ensuring optimal performance and functionality. Committed to staying abreast of the latest industry trends and technologies for continuous improvement. Seeking an opportunity to contribute expertise and passion for delivering high-quality Angular solutions in a dynamic team environment.

Experience

Sep 2022 - April 2024

Business Gateways International - Chennai, India.

Junior Front End Developer

- Integrated UI elements such as charts, tables, forms and other interactive features into the application using Angular Material.
- Creating self-contained, reusable, and testable modules and components.
- Developing user-facing applications using Angular and React.
- Created custom directives to extend the functionality of existing components.
- Implemented reactive forms and template-driven forms for user data input, ensuring data accuracy and validation.
- Utilized Angular CLI for project scaffolding, code generation, and deployment, optimizing development workflows.

Projects

JSRS - Joint Supplier Registration System (JSRS)

- Joint Supplier Registration System (JSRS) is a 'single window' supplier registration and certification system implemented on behalf of the Ministry of Energy and Minerals, Oman as an industry-wide procurement system.
- Proficient in designing engaging and responsive email templates using HTML and CSS.
- Worked intensively on Bug Fixing and Design Update.

OPAL - Unified Services Platform.

- Oman Society for Petroleum Services (OPAL) Unified Service Provider is designed to cultivate a Global Community of Open & Interactive Learning
- Integrated RESTful APIs to fetch and update data, enhancing the overall functionality and user interactivity of the application.
- Implemented routing and navigation features, enhancing the user experience by creating intuitive and easily navigable interfaces.
- Contributed to the design and implementation of a component-based architecture, fostering code reusability and maintainability.
- Collaborated with QA teams to conduct thorough testing, identifying and resolving issues to ensure the delivery of high-quality products.
